

**For Immediate Release:**

## **City Apartments announces "nearly free" international telephone calls for all guests**

**22nd May 2005** -- Today City Apartments announced it has secured a deal with British Telecom (BT) that enables them to offer amazing low calling cost to all their guests - direct from their apartments.

In line with their persistent policy of wishing to avoid charging their guests marked up costs on "extras" they have exceeded all expectations by securing a great deal on all their apartments telephone lines - and then passed those savings straight on to their guests.

Jono Dennis - a founding director said "It's great when you're in a foreign country and away from your family to feel you can just pick up the phone and have a gas without needing to arrange a mortgage first!! Most hotels and apartment providers mark up the phone charges by outrageous amounts. We, as usual, have bucked the trend and not just negotiated great prices for our guests calls but past those savings straight on to our guests."

Today City Apartments announced 10p per hour calling rates for the States and many other countries.

### ***About City Apartments***

*City Apartments is regarded as the leading independent full service short-term apartment provider in 'The Square Mile' of the City of London's financial centre, offering 80 well-appointed apartments in key locations. Its clients are exclusively from the international business community and its guests are those companies' employees, families and friends.*

*City Apartments' offering is simple and straightforward: high-quality, serviced accommodation, providing hotel-standard comfort within the ambience of a private residence, and at a fraction of the cost of a hotel. All apartments are owned, furnished and maintained by City Apartments to its exacting standards. To City Apartments, excellent customer service means exceeding its clients and guests expectations every time. Its service delivery philosophies are based on first-hand experiences as both guest and operator of the growing serviced apartment concept, with innovative thinking and cost-saving services fundamental to its forward thinking approach.*

*Indeed, City Apartments regard superior technology, combined with friendly, professional and individual attention, as its hallmark.*

*City Apartments. Simply better living in the City.*
